

## ZÜRN 540

High-Clearance Tool Carrier.

Model	ZÜRN 540
Track width	1.50 / 1.75 / 2.00 m
Ground clearance	1.30 m / 1.60 m
Weight	approx. 2,900 kg
Engine power	36 kW (49 hp)

## The simple tool carrier

Multi-functional tool carrier for crop care and other tasks.

### Versatile

The high-clearance tool carrier is perfect for crop care applications but can be used for a wide range of tasks throughout the year: Plot dividing, swathing, fertilizing, crop care, phenotyping.

### Economic solution

With its simple concept, the ZÜRN 540 tool carrier is the cost-effective alternative to the bigger ZÜRN 550. Many parts of the robust design were adopted by the proven plot combine harvesters.

#### High ground clearance

With 1.30 m ground clearance and slim portal axles, the ZÜRN 540 is perfect to work in cereal plots without harming the crops. Longer portals for 1.60 m ground clearance are available as option.

#### High traction and good stability

Large tires ensure low ground compaction and offer high traction even in difficult ground conditions. The parallelogram suspension with height adjustment on the rear axle facilitates accurate guidance of the implements.

#### Comfortable workplace

The intuitive operating concept is well known from the plot combine harvesters. The comfortable workplace is equipped with a multi-function lever to control the two-speed hydrostatic drive and other functions for the implements.

#### Quickly field-ready

A foldable roll bar ensures optimum work health and safety on the open platform. It can be equipped with a canopy on request. The low overall height of the tool carrier allows simple transport without special low-bed trucks.

#### Gentle crop dividing

Our long, shallow-sloping torpedoes are gentle to the crops. Instead of actively driven tools, passive guide plates between the axles form perfectly divided plots.

#### Flexible attachment points

Both front and rear linkage come with various options to carry and drive a wide range of standard or special implements.
